

# CCSD Integrated Technology Workshop V

Prepared by Tony Lescak, Technology Specialist

## **Interactive Whiteboards**

### Introduction and Demonstration

**In this workshop we will be introduced to the different software used with interactive whiteboards: SmartBoard® software, Mimio® software, and Promethean® software.**

**This workshop will familiarize the staff of Candler County School District (CCSD) with the possibilities available through the use of interactive whiteboards as well as build the confidence needed to integrate them into daily classroom instruction.**

The interactive whiteboard is a high-tech replacement for the chalkboard. Interactive whiteboards add endless possibilities for instructional presentations limited only by the teacher's imagination. We now have the capability of bringing color, pictures, internet resources, video and student interactivity to the old fashioned chalkboard or dry erase board. IWs are part of CCSD's vision of the 21<sup>st</sup> century classroom.

This outline will identify the three different software packages available for use at CCSD as well as provide links for preplanned lessons that can be opened on the interactive whiteboard. Detailed instruction, documenting step-by-step use of interactive whiteboards is available on CCSD's website. Click on the "Instructional Technology" link and scroll down to Workshop 5. The user's guide for SmartBoard, Promethean, and Mimio are available for download.

The software used with the Mimio is called **mimio Notebook & mimio Tools**

The software used with the SmartBoard is called **Smart Notebook Software** and **Smart Board Tools**

The software used with the Promethean is called **Activprimary V3** (Elementary) and **Activstudio**

Preplanned lessons are a great way to get to know your interactive whiteboard and inspire you to create lessons of your own.

They are available for download here:

Mimio: <http://www.mimio.com/solutions/education/lessons/index.php>

Promethean: <http://www.prometheanplanet.com/us/server/show/nav.802>
